

20201 SAI VERIFICATION (SAI V) - CENSUS TRACT CODE REVIEW MAP: Bowman County, ND

The map displays Bowman County, North Dakota, with its boundaries and surrounding areas. The county is bordered by Montana to the north, South Dakota to the south, and Fallon County to the west. The map shows various census tracts and precincts, including:

- 9652** (pink)
- 9653** (red)
- 9654** (orange)
- 9655** (green)

Key locations and features include:

- Water Bodies:** North Fork Grand Lake, Marmarth Lake, and several smaller lakes.
- Roads:** Major roads like Highway 1 and Highway 2 are shown.
- County Boundary:** The boundary between Bowman County and Fallon County is marked.
- Neighboring Counties:** Fallon County, Montana, and South Dakota are labeled.

The map is a detailed representation of the county's geography and administrative divisions.

CENSUS TRACT CODE REVIEW MAP - LEGEND

SYMBOL	DESCRIPTION	SYMBOL	DESCRIPTION	SYMBOL	DESCRIPTION
	American Indian Reservation and/or OH-Reservation Trust Land		Interstate or U.S. Highway		MCD
	not labeled		College or University		March 1st
	NEW YORK 36		4WD Trail, Stairway, Alley, Walkway, or Ferry		
	ERIE 029		Rural CD		
	Lee town		National Park or Forest		
	MILFORD		Outside Subject Area		
	Davis		Inset Area		
	Cochiti				
	33.07				

Where state and county, and/or MCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

State and county names are followed by their FIPS code.

1 MCDs are symbolized and labeled only in the 12 strong MCD states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

2 Incorporated place name color corresponds to the incorporated place fill color.

3 The full census tract code consists of six digits with an implied decimal point between the fourth and fifth digits. For legibility on this map, the leading zeros have been stripped and the decimal point is shown. To translate a census tract number on the map to its full code, add as many zeros as needed to the left side of the number to reach six total digits and remove the decimal point before the last two digits.

Example: Census tract number on the map "33.07" represents census tract code "003307"

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.
